Joint CBA/SIA Seminar and Workshop

Guidance for the Storage of Combustible Liquids in IBCs

Intermediate Bulk Containers (IBCs) have been implicated in many incidents such as stack collapse, leakage of contents and serious fires. High standards in their use are an important aspect of risk management. This workshop will engage delegates in the potential hazards of combustible liquid storage, practical considerations for use and safe storage, assessment of risk, design and testing considerations and legal responsibilities.

Armed with the latest legislation, guidance, practical exercises and industry experiences it is anticipated that the delegates will be well informed to achieve safe working practices.

09:15	Registration and Coffee
09:45	Welcome & Introduction
	Regulatory Requirements - Clive Dennis, HSE HID
	Implementation and Rationale - Andy Holton & Doug Leech, CBA & SIA Storage Guidance Working Group
