NEW SOLVENT INDUSTRY WEBSITE GOES LIVE!

Brussels, 10 November 2009 -- The European Solvents Industry Group –ESIG- is launching a brand new website delivering fast and comprehensive information on solvent uses and benefits or regulatory information to ESIG tools and publications.

After several months of analysis and review, ESIG hopes that it will make life easier for everyone interested in solvents. The structure and navigation interface of the website have been redesigned to improve its user-friendliness and allow for a better web surfing experience. Its new design includes exciting and innovative new features, such as an interactive map of Europe, providing an overview of all the ESIG Product Stewardship Award winners.

www.esig.org

Welcome to the ESIG website

Our mission is to support the sustainable and responsible use of oxygenated and hydrocarbon solvents through dialogue, information sharing and solutions that address health, safety and environmental aspects.

Publications

Safe Handling of Solvents DVD

In order to further strengthen the safe handling of solvents ESIG - together with the SIA (Solvents Industry Association) - has produced a DVD, which illustrates all the fields where solvents are used requiring a special and careful manipulation.

EDITOR'S NOTES:

Established in 1996, the European Solvents Industry Group (ESIG) represents Europe's major solvents manufacturers including companies such as BASF, Dow Chemical, ExxonMobil Chemical Europe, Ineos, LyondellBasell, Shell Chemicals and Total.

ESIG's primary mission is to support the sustainable and responsible use of solvents through dialogue, information-sharing and solutions that address health, safety and environmental issues. ESIG believes that solvents are simply essential to everyday life and has spent over a decade demonstrating how people benefit from their unique properties.
