

ESVOC 2019 – NEW ERA

SOLVENTS DOWNSTREAM USER
COOPERATION PLATFORM

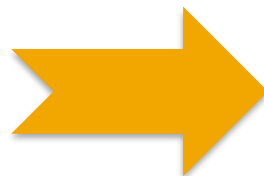

STARTING POINT

ESVOC STRUCTURE

AIM

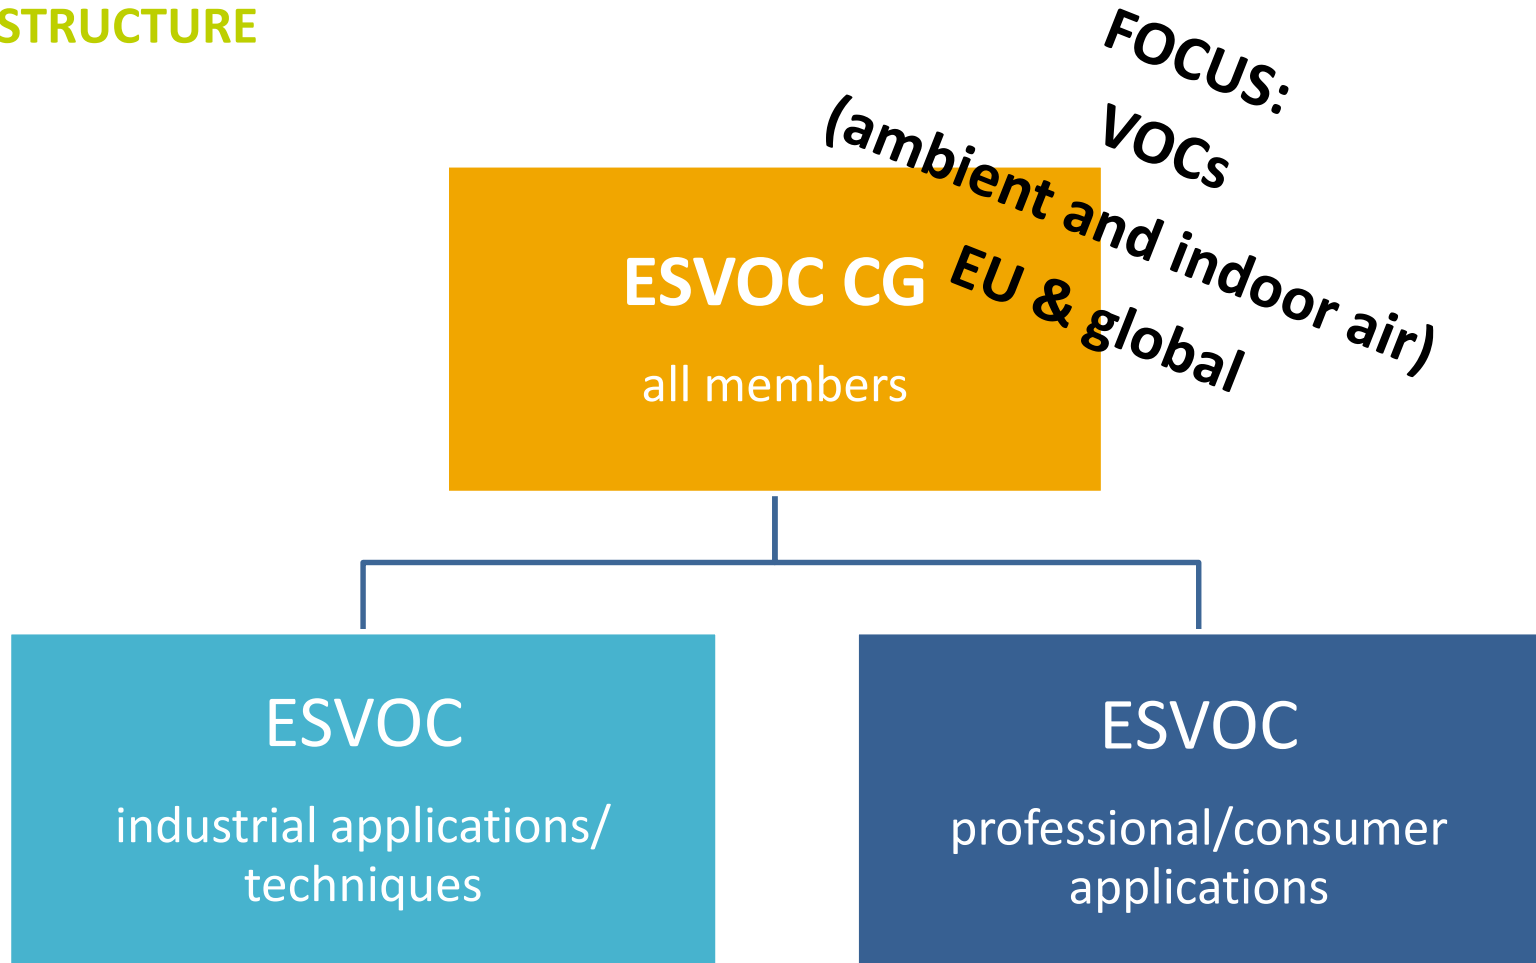

Provide a platform for **meaningful & effective** DU co-operation throughout the **solvents supply chain**

- relevant topics
- relevant structure
- functioning distribution list

ORGANISATION

ESVOC STRUCTURE

ESVOC MEMBERS

WHO IS WHO

ACEA	EUPIA
AFERA	Eurometaux
AISE	EWV
ASD	FEA
CEPE	FECC
Cosmetics Europe	FEICA
ECCA	Fertiliser Europe
ECPA	Finat
EPF	FPE
EFPIA	Intergraf
ERA	MPE
ETRMA	SMRC
	SRM

25 solvent using
DU associations

ORGANISATION

ESVOC STRUCTURE

ESVOC

Industrial Applications/techniques

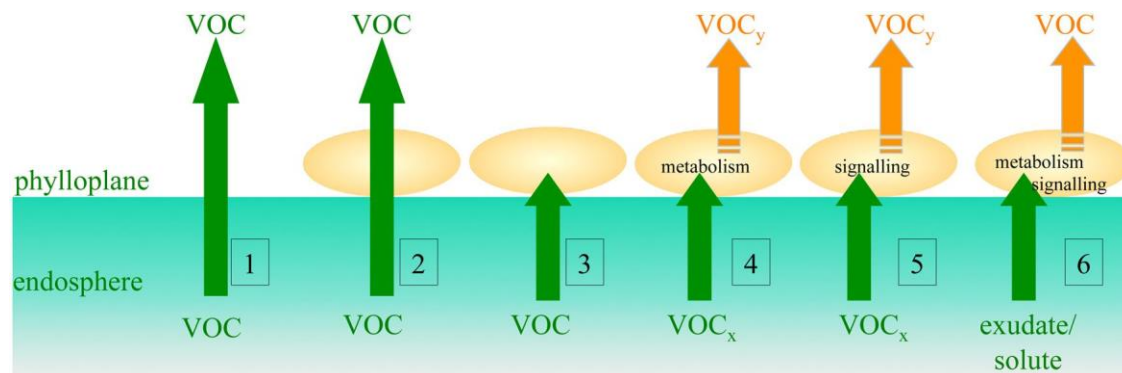

- **Topics:** BREF STS, UNECE TFTEI for clearing house, OSH, ESIG inventories, IED review

ESVOC

professional/consumer applications

- **Topics:** Domestic use of solvents, NMVOC inventories, Secondary Organic Aerosols & PM2.5, Indoor Air

Solvent VOC topics 2019

CHALLENGES 2019: VOC

WHY DO WE NEED ESVOC

- **National Emission Ceiling Directive Implementation**
 - By April 2019 all EU Member States needs to provide plans to the EU Commission on how they want to meet their national targets (No_x, SO₂, NMVOC, PM2.5, NH₃)
 - « creative » ideas are already pronounced: UK: labels for VOC CONTENT in consumer product
- **Ambient Air Directives**
 - Once the climate change issue is taken care of we expect the EU COM to concentrate more on air quality issues especially as the EU is far from the WHO targets for some major pollutants
 - VOC emissions from consumer products attributing to bad air quality via secondary organic aerosols /PM2.5 has been raised the US recently
- **Indoor Air Quality**
 - Expected to be another big upcoming topic: more time is spent indoor –again climate issues prevailed but now focus is on health aspects / VOC emissions from construction/consumer products could be in the focus / ecolables

- **REVIEW IED + STS BREF**

- **VOC and OSH**

- **Other solvent related topics**
2019

TOPICS 2019: NON VOC

- **ESIG solvents award**
- **REACH & Classification issues**
 - Example: EGBE
- **Recycling: Solvent streams**
 - Öko-Institut study for the EU Commission/DG Environment
